DETAILED ACTION

Election/Restrictions

1. Claims 36-38 are generic to a plurality of disclosed patentably distinct species of non-ionized drugs. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, *i.e. a single drug*, even though this requirement is traversed. Applicant should include a chemical structure of the elected compound if not already contained in the specification. Thus species are distinct because their structures and physicochemical properties differ.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
